

♡ CHD ♡  
**AWARENESS**

**1 child every 15 minutes is born with CHD.  
Only 1/3 of babies are diagnosed in utero.  
Most cases of CHD have unknown causes.**

**There are a minimum of 14 major heart defects.**

**Have you had your heart checked?**

**Screening for a heart defect  
is non-invasive, but does  
require sitting still.**

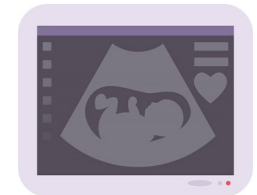

**A technician will take pictures of your heart.**

**This procedure is called a cardiac echo.**

**Contact your local primary care provider for more information.**

**Be someones heart hero and spread awareness.**

**Please wear Red & Blue during  
Congenital Heart Defect Week at your school.**

**For more information on Congenital Heart  
Defects in Children please visit:**
